Subject: **REACH Regulation**

Dear Customer,

The REACH Regulation, adopted on December 18th, 2006 by the European Council and Parliament, aims to ensure that any use of at-risk products is limited or substituted where possible. Since June 1st 2008 the manufacturers or importers of any substances (to be used as is, in preparation or articles) must register them when manufactured or imported in quantities of at least 1 ton/year and when these substances are not exempted from compulsory registration. Our suppliers are all in compliance with the presence of Very High Concern (SVHC) and all of them guarantee to us the conformity.

Following REACH nomenclature, R.P.E. is a downstream user and our parts don't need any registration.

We have a system in place to ask our suppliers confirming the REACH compliance or to inform us in writing their action plan to comply that regulation.

Based on suppliers' answers we'll keep you informed of any part and document variation will occur, if any.

Yours, sincerely

E. Francione
Quality Manager
